

For car and train enthusiasts

Märklin my world has the 'Car Transport' starter set in its program for children ages three and up. The three-car freight train transports two luxury cars safely over the track on the car transport car with a folding loading ramp. The diesel locomotive comes with various sounds and lights. It is steered using an infrared control unit. The set also includes various stickers to decorate the locomotive and wagon.

Two luxury cars can be transported safely over the rails with the 'Car Transport' from Märklin my world. Zwei Luxuskarossen lassen sich mit dem „Autotransport“ von Märklin my world sicher über die Schiene transportieren.

New balls

Schildkröt (via **MTS Sport**) has expanded its range of balls: among other things, a volleyball is now available that has official tournament dimensions with ball size 5 and a weight of 260 g. The classic match ball with 18-panel construction made of Soft Touch synthetic leather is robust, hard-wearing and, thanks to the seamless lamination technology, retains its shape and is durable.

There is also a soccer made of abrasion-resistant and durable synthetic leather, which also has official tournament dimensions. It comes with a classic 32-panel design and a robust and dimensionally stable rubber bladder.

71C-77

Both volleyball and soccer have official tournament dimensions. Sowohl der Volley- als auch der Fußball haben offizielle Turniermaße.

New special area for model railway enthusiasts

In the model railway and model making segment, a new 'special' is making its way into Hall 7A with an action area and presentations of new products, allowing all interested parties to experience the products in action. The most outstanding highlights from the model railway and model making product

group will be impressively presented exclusively in special showcases. Visit the new presentation area to find out all about the latest innovations and product highlights in this product area.
