

## On Track with the Mouse

With the "Mauszug" starter set, **Märklin** my world combines classic model railway play with the popular **WDR** license "Die Maus". At the heart of the set is a five-car ICE high-speed train measuring 63 cm in length, featuring a child-friendly design with cheerful Mouse motifs, applied using stickers, as it runs along the self-assembled track. Intuitive play is ensured by the Märklin Power Control Stick, offering direction control, three speed levels, sound effects and dual headlights. Sturdy, easy-to-assemble track sections, secure magnetic couplings and permanently installed electronics guarantee robust and child-safe handling. The set includes 26 track sections as well as one left-hand and one right-hand switch; rechargeable battery, charging cable and batteries are included.

The starter set will be available at retail from July/August 2026.

## Big fun in a small format

Table tennis with a difference: the mini version offers the perfect fun for young and old, for table tennis enthusiasts and beginners! The mini table tennis table from **Schildkröt** (via **MTS Sport**) measures 69 x 33 x 9 cm and comes with two mini plastic bats, a table tennis ball and a small matching net. Super practical: the table can be folded up for transport and is about the size of a briefcase. All parts (bats, ball, net) can be stored in the "case," so nothing gets lost and you can easily take the small table with you to the next housewarming party or similar event.
