

Sun protection for skin and lips

KHK's compact sun care products in stick format provide protection against sunburn and harmful UV rays. The *Lipcare Original* is a classic lip balm stick that is optionally available with SPF 20 or 30 and in a choice of ten different shades. The compact *Suncare Stick* with SPF 30 offers an extra-large application surface for the face and lips and can be individualised with a 4c label.

The *Suncare Eco* that comes in an ecological push-up container made of FSC-certified cardboard is ideal for campaigns that focus on sustainability. The vegan case is produced completely without plastic and is also compostable. As well as coming with SPF 30, *Suncare Eco* is also available in a vegan, natural cosmetic-compatible formula with an extra-high sun protection factor of 50. The minimum order quantity for many sticks is 300 or 500 pieces, the minimum volume for *Suncare Eco* with SPF 50 is 1,000 pieces.

Fresh neoprene look

A new lease of energy is on its way for outdoor games: Schildkröt has relaunched the *Neoprene Beach* collection and is relying on colour-contrasted combinations of trendy appearance. Here, neoprene remains to be the ideal playtime material for the beach – lightweight, soft and with a pleasant grip. The neoprene baseball bat helps beginners overcome their fear of taking a full swing, whilst the Peteca shuttlecock impresses with its saltwater-resistant surface and less skin irritations thanks to its soft, grippy texture.

The neoprene beachball set also features elastic stringing for extra distance in flight and comes with a net bag for convenient transportation. The Velcro ball set boasts robust, quilted catch discs and adjustable wrist straps. The product range is complemented by neoprene balls in new colour variations – perfect for football, volleyball or American football.

Perfectly equipped

Victorinox offers the right equipment for a workday with organised processes and focused attention, whether in the office or while travelling. From precise watches and functional luggage through to the emergency multi-tool for unexpected situations, the Swiss company provides products that stand for reliability.

The *Huntsman Lite Emergency Tool* features 23 functions to ensure one is well-prepared for any possible emergency – including a practical LED light and a whistle. Thanks to a built-in fire starter and fire stick,

the multitool can even be used to start a fire without the availability of gas or electricity to provide warmth. The multitool is manufactured in Switzerland and can be customised with an etching on the blade, pad-print or engraving on the shell.
